

# Old and unmaintained orchards

<b>An identifying name</b>	<b>Your name</b>	<b>Contact email</b>
<b>Tree or orchard location</b>		
<b>Nearest town</b>	<b>County and Province</b>	<b>GPS or lat/long</b>
<b>Orchard description</b>		
History of the orchard (e.g. age, when it was no longer maintained, past owners)		
Current condition (e.g. are most trees still alive?)		
Cultivar information (Is there any information about what varieties may have been grown? Do you have some guesses, based on the appearance of the fruit?)		
Fruit descriptions (you can also email us pictures if you have them)		
Is there anything else you want to tell us about the orchard?		
<b>Ownership and access</b>		
Are you the owner of the property? If not, do you know who is?		
If you are the owner, would you be willing to allow:		
-location information for the orchard to appear in a publicly available database?		Yes No
-the approximate location of this orchard to appear on a publicly available map?		Yes No
For both questions above, the publicly available material would make it clear that access to orchards on private land is not permitted without permission of the owners. No information about the owners would be provided to the public without the owners' consent.		
Please send this form, along with any additional questions, comments, and/or images, to Paul Kron at <a href="mailto:pkron@uoguelph.ca">pkron@uoguelph.ca</a>
